

TASS <> Wonde Integration Guide

One of the applications used by your school connects directly to TASS through the Wonde platform, saving you the need to transfer data between systems using CSV's.

As your school is yet to have the integration setup with Wonde, the following information is required by Wonde so we can connect to your TASS API system.

1. **TASS URL** - This will be the school's external TASS.web domain that you use to access TASS, for example: **https://[domain]/tassweb/api/_**
2. **Company Code** - This is the school/company that your school operates under and the TASS API has been set up in.
3. **Application Code** - This is the code entered when configuring the TASS API in program, this is located through the following path: **System Admin > Utilities > API Gateway Maintenance**
4. **Token Key** - The token is generated when configuring the TASS API in program following step 3: **System Admin > Utilities > API Gateway Maintenance**

Repeat steps 3 and 4 for each key that is required. We currently use the following API keys.

- Student
- EmployeeHR
- LMS
- Identity Management

Once the above steps have been completed, please email the URL for your TASS URL and Company Code along with Application Code and Token Key for each different API to support@wonde.com
