# Wonde - SIMON Integration Guide

[Wonde](#) enables schools to sync data from their Student Information System (such as SIMON) to their approved 3rd party applications.

In order to get the SIMON and Wonde integration setup, please see further information below.

Note: If your school uses SIMON in conjunction with another Student Information System (Synergetic, SAS2000, Civica, ICON ect.) and you are unsure if SIMON is the correct system for Wonde to connect with, please book an appointment below.

A full list of systems we currently integrate and guides on how we connect can be found [here](#).

**To install Wonde at your school** you will need access to:

- the server on which the SIMON SQL database is hosted
- the name of this server
- administrator privileges to install the Wonde client program.

The Wonde client program ([download here](#)) is configured using credentials securely provided to Wonde by SIMON. As such, configuring the Wonde client is done by a member of the Wonde Integrations team.

**To finalise the integration or if you have any questions**, simply [book an appointment](#) with the Wonde Integrations Team and we will be happy to assist you.
