

PCSchool

Integration Guide

One of the applications used by your school connects directly to PCSchool through the Wonde platform, saving you the need to transfer data between systems using CSV's.

As your school is yet to have the integration setup with Wonde, the following steps need to be completed.

Please note: whilst Wonde doesn't charge schools to connect, depending on which application you are integrating with, PCSchool may charge a set up fee.

Integrating Wonde with PCSchool:

1. To set up the connection between the approved application and your PCSchool system, your school will need to email support@pcschool.net with a request to "Authorise Wonde to access school data".
2. PCSchool will create the credentials for the connection and securely forward these on to Wonde.
3. The Wonde team will then complete the process and confirm the connection is working successfully.
