SatchelOne Integration Guide

April 2024

wonde

A third-party application used by your school uses Wonde to access school data from a number of MIS providers such as SatchelOne. As your school is yet to have the integration setup for Wonde, the following steps need to be completed.

Integrating Wonde with SatchelOne:

1. To set the connection up between the approved application and your MIS, your school must email partner_support@teamsatchel.com (cc'ing support@wonde.com) with a request to obtain a token (this token provides access to the SatchelOne API for the Wonde integration).

2. Once the token has been received, please securely forward it to support@wonde.com (alternatively, please call us on 01638 438094).

3. The Wonde team will complete the process and confirm the connection is working successfully.
