SchoolPod MIS integration guide

A third party application used by your school uses Wonde to access school data from a number of MIS providers such as SchoolPod. As your school is yet to have the integration setup with Wonde the following steps need to be completed.

Integrating Wonde with SchoolPod:

1. Please log into SchoolPod with an administrator account.
2. Click on the admin button at the top right hand side of the browser window, this is highlighted in the picture below.

3. Scroll down the page to the Export and Import section and click on Export.

4. Scroll down the page to the Settings and click on the Export Settings.
5. Tick the box for 'Allow exporting of School data to Wonde'. We would advise reading the supporting text for this so you are aware of how this works.

6. Once enabled please email in to support@wonde.com or give us a call on 01638 438094 to let us know this has been completed.
7. The Wonde team will then get in touch with SchoolPod to complete the process and confirm the connection is working successfully.

If you have any questions, contact our support team by calling 01638 438094 or email support@wonde.com.
