WCBS Pass/3sys MIS integration guide

A third party application used by your school uses Wonde to access school data from a number of MIS providers such as WCBS. As your school is yet to have the integration setup with Wonde the following steps need to be completed.

Integrating Wonde with WCBS:

1. Log into the WCBS API account management section.
2. Navigate to 'Third Party Licences' and select 'Add new third party'.

3. Under details, add in the following:
 - Code: WONDEAPI
 - Name: Wonde Ltd
 - Contact: Technical Support Team
 - Contact Email: integrate@wonde.com
 - Details: (i.e. third party integration)

The screenshot shows the 'New Third Party Licence' form in the WCBS API account management interface. The form is titled 'New Third Party Licence' and has a 'Details' section. It contains several input fields: 'Code' (pre-filled with 'WONDEAPI'), 'Name' (pre-filled with 'Wonde Ltd'), 'Contact' (empty), 'Contact Email' (empty), and 'Details' (empty). There are 'Save' and 'Cancel' buttons at the top left of the form.

4. Generate a new 'Client Secret', if one is not already present, and copy both the Client ID and Client Secret to a safe location as these are needed for the integration. Save all changes in WCBS.

The screenshot shows the 'View Third Party Licence' form in the WCBS system. The form is divided into two main sections: 'Details' and 'Credentials'. The 'Details' section includes a 'Close' button and fields for 'Code' (WONDEAPI), 'Name' (Wonde Ltd), 'Contact', 'Contact Email', and 'Details'. The 'Credentials' section includes fields for 'Client Id' and 'Client Secret', each with a copy icon to its right. The top of the page features the WCBS logo and navigation links for 'Licensing Details', 'API Administrators', and 'Third Party Licences'. A 'Logout' button is also visible in the top right corner.

5. We will now need to determine the School's ID. Navigate to your school's domain (i.e. <https://yourschoolname.co.uk/Wcbs.API/api/swagger>) which will take you to Swagger.
6. Click on Login, which will then display an OAuth 2.0 credentials login screen. Log in with Client ID and Client Secret details you copied from step 4. Click Authorize.

The screenshot shows the Swagger API interface for Wcbs.Api. The top bar is green with the Swagger logo and a search bar containing '/Wcbs.Api/api/swagger/docs/v200'. Below the bar, there are buttons for 'Login' and 'Explore'. The main content area lists various API endpoints such as 'BillingAccounts', 'Names', 'Pupils', 'Relationship', 'Rooms', 'SchoolCalendars', and 'Schools'. A modal window titled 'OAuth 2.0 credentials' is open, showing fields for 'Client Id' (client id), 'Client Secret' (client secret), and 'User credentials'. There are 'Authorize' and 'Cancel' buttons at the bottom of the modal. The 'Schools' endpoint is highlighted with a blue bar, and a 'Returns all schools' button is visible next to it.

7. Click on Schools, followed by 'Returns all schools'.
8. Scroll to the bottom of the parameters list and click 'Try it out!' This will then return a response and within this you will see "Id": followed by a value (e.g. '1') - this is the WCBS School ID that Wonde uses and needs for the Integration.
9. Please supply the following information to support@wonde.com:
 - WCBS URL
 - WCBS School ID
 - WCBS Client ID
 - WCBS Client Secret
10. The Wonde team will then complete the process and confirm the connection is working successfully.

3rd party consent

In the PASS API versions 2.2 and above there was an addition of a GDPR component which needs to be ticked for all users to allow 3rd party consent to allow us to be able to view their data.

How to Record Data Sharing Consent by Individual in PASS 5.6+:

1. Go to **Database > Individuals** and select the relevant person on the Individuals Listing screen. The relevant Maintain Individuals screen appears.
2. At the bottom of the **Personal Details** tab, tick the 'Has this individual provided their consent for the school to share their details, including sharing them with approved 3rd parties?' check box.
3. Click **Update**.
4. You are returned to the User Login Listing screen.
5. Repeat this sequence for any user who has given the relevant consent. Please note that this will need to be done for students, contacts and employees but can be done in bulk.

If this box is not present on your system then please go to the following:

1. Go to **Database > Security > User Configuration > Users** and select the relevant user on the User Login Listing screen.
2. On the **Data Protection** 2 tab, tick the 'Individual Consent tick box' check box.
3. Click **Update**.
4. You are returned to the User Login Listing screen. The next time that the user logs in, they will be able to record data sharing consents individually or in bulk.

If you have any questions, contact our support team by calling 01638 438094 or email support@wonde.com.
