Education technology should empower schools, not overwhelm them.

As the digital landscape in schools grows more complex, the gap between having the right tools and actually using them safely is widening.

Wonde closes that gap.

We provide the invisible, secure infrastructure that removes the administrative friction of EdTech, allowing you to focus on what matters most: **the classroom.**

From initial search to long-term security, we simplify the entire lifecycle of your digital tools:

The three pillars of Wonde

 Discover A curated marketplace to find high-quality EdTech tailored to your school's needs.	 Connect The global standard for seamless, automated data integration between your SIS and your apps.	 Control Your centralised command centre for data privacy, user permissions, and total oversight.
--	---	---

Proven at scale

Trusted by **30,000+** schools and **700+** applications globally, Wonde is the established leader in education data integration. We don't just move data; we protect the integrity of your school's digital future.

Discover

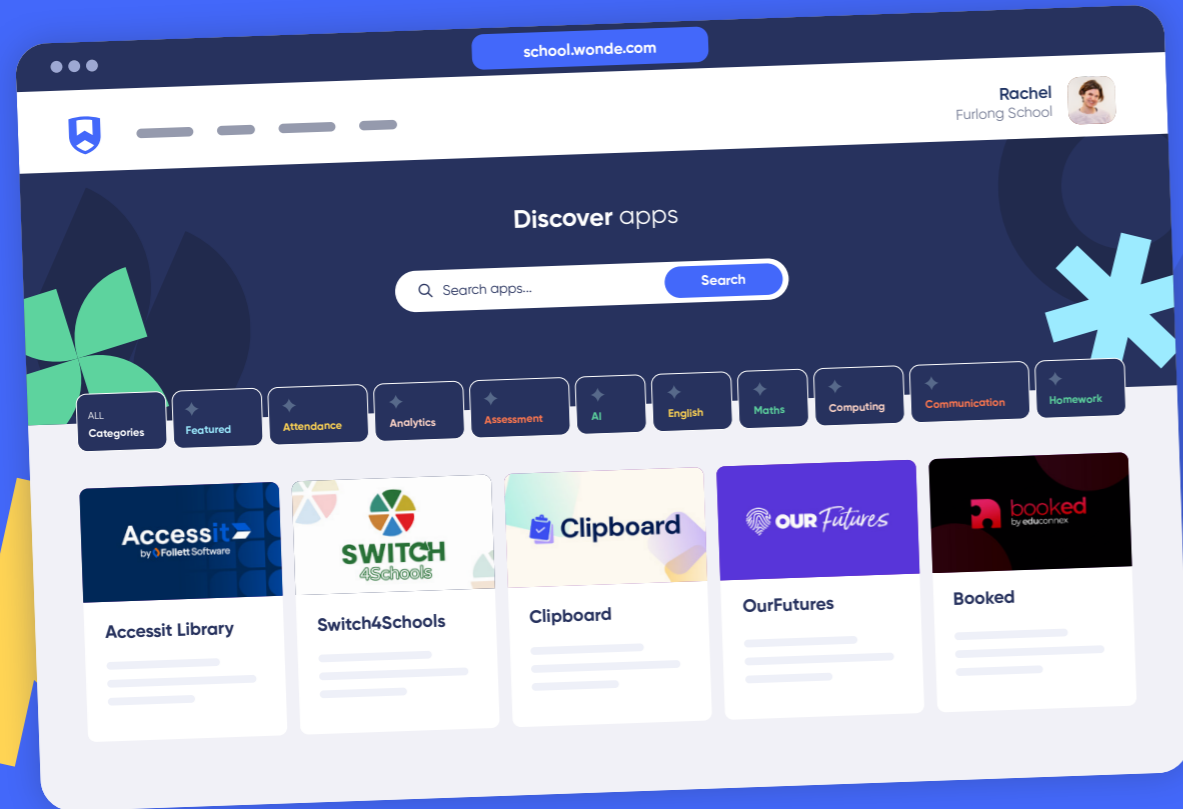

EdTech exploration, simplified

Too many apps, too little time

With thousands of tools available, the challenge isn't just finding technology—it's knowing which apps are effective, bring value to your school, and work seamlessly with your existing systems.

The solution - A trusted marketplace

Wonde Discover is a curated, centralised platform designed to help you evaluate and engage with high-quality EdTech with total confidence.

Curated excellence

Browse apps by category and school type, knowing every one is a trusted partner of Wonde.

Trust for Jurisdictions

Offers jurisdictions the perfect balance of control and freedom. Trusted security protocols allow schools to choose their own tools while maintaining central data standards.

Instant enablement

Enable apps directly through your existing Wonde connection. No new setups, no manual data entry, and no integration headaches.

Discover

Why Discover is the **best choice** for educators

Eliminate setup burden

Experience onboarding that allows you to deploy new tools across the school instantly.

Security by design

Every app in the marketplace uses Wonde - where data protection is our top priority.

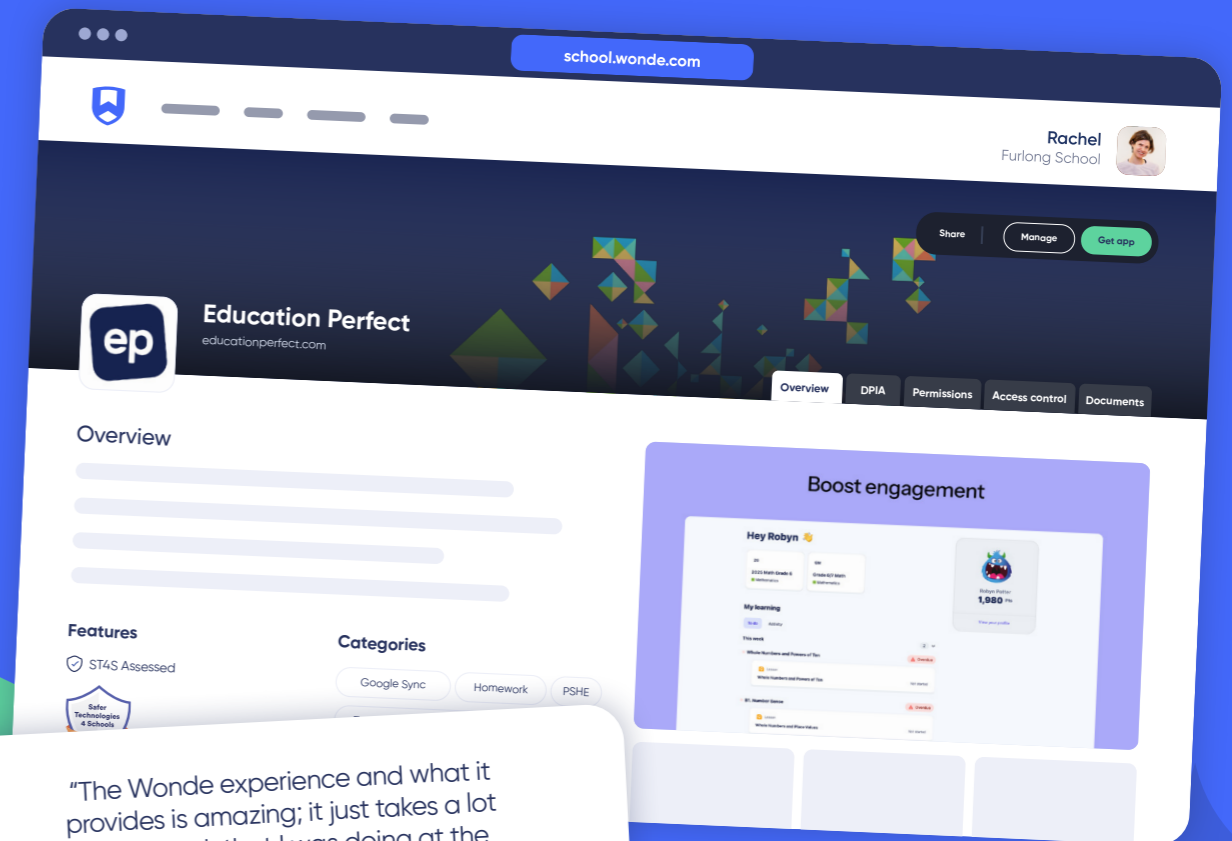

Optimised outcomes

By removing the technical barriers to entry, you can focus on choosing the tools that actually improve learning outcomes.

Stop searching and start discovering. Wonde Discover is where your school's next great learning journey begins.

wonde.com

"The Wonde experience and what it provides is amazing; it just takes a lot of that work that I was doing at the beginning of the year off my plate."

Emma Whiteman
Newington College

Connect

The gold standard in data integration

No more complex setup. No more manual exports.

As schools adopt more digital tools, the burden of managing data grows. Wonde eliminates this friction. By acting as the secure bridge between your school's Student Information System (SIS) and your educational apps, we ensure that the right data gets to the right place—automatically.

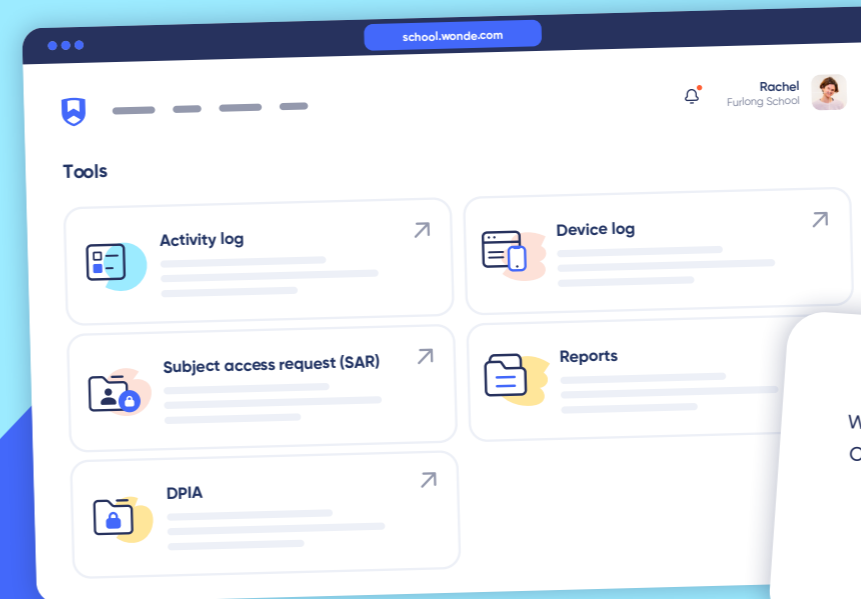

Control

Governance at your fingertips

The Wonde School Portal | Your command centre

Ensure you have total authority over your entire digital estate. The Wonde School Portal serves as your command centre, providing the granular oversight necessary to protect your community and maintain absolute compliance.

Transform complex data management into a clear, visual dashboard, giving you a single view of your entire digital estate.

"Wonde is a game changer for us. We wanted to bring it in straight away to get rid of all those manual processes-it just works."

Integrated Systems and Database Administrator
QLD Independent School

"Implementing Wonde has been a great solution for us, and has enabled us to replace some less than ideal methods of information exchange with apps and services"

Deployment Administrator
WA Independent School

"Our preference is anything that's integrated with Wonde, we try and knock everything else on the head."

ICT Manager
VIC Catholic School

Avoid manual data management

Forget the days of CSV exports, endless spreadsheets, and manual user updates. Put all your apps in your Wonde portal so no more CSV admin!

Automated accuracy

Apps update automatically as staff and students change. Maintain a single source of truth while eliminating manual errors and security gaps.

Zero-friction onboarding

Launch apps instantly. With Wonde's SIS integration, your class lists and profiles are ready from day one.

Gold standard security

Fully encrypted data with total control. You decide exactly what each app sees, sharing only what is necessary.

We don't just bridge systems; we remove the administrative 'noise' that keeps IT managers and School Business Managers up at night.

Total visibility

See exactly which applications are accessing your data, which fields they are reading, and when the last sync occurred.

Granular permissions

Stay in control. Approve or revoke data access for any app with a single click, and manage permissions right down to the group or individual user level.

Compliance made easy

The portal simplifies the heavy lifting of data protection. From managing DPIAs (Data Protection Impact Assessments) to processing SARs (Subject Access Requests), everything is centralised.

Audit trails

Maintain a robust, time-stamped log of all data activity. Whether for internal reviews or external inspections, your evidence of compliance is always ready.

Unlock enhanced control and flexibility with Wonde Premium

Wonde Premium provides access to a suite of powerful tools and features ensuring the ultimate data management experience, empowering your school to streamline processes, safeguard data, and maintain full control.

Why use Wonde Premium?

Trigger your own data sync

Sync your school's data with Wonde when you need it. No more waiting for scheduled syncs—enjoy real-time flexibility.

Data protection request tool

Easily track and manage student data. View what data is shared, and with which apps, from a centralised, student-centric view.

View your own data in Wonde

Get full visibility of your data within Wonde, enabling you to troubleshoot issues directly with your applications.

Dynamic access controls

Automatically update your data-sharing filters, ensuring they always reflect your latest SIS data.

Enhanced app directory

Access detailed security information for every app, authorise teacher use, and preview app data permissions with confidence.

Comprehensive reporting

Stay informed with user activity and device log reports—keeping you in control of your school's tech ecosystem.

Priority support

Get the help you need, when you need it, with priority access to Wonde's expert support team.

Transform your school's data management today with Wonde Premium

About Wonde Premium

Wonde Premium is a subscription-based platform designed to provide comprehensive, secure management and control over your school's data. It offers advanced reporting, enhanced security features, and compliance tools to simplify data handling. By optimising efficiency and safeguarding sensitive information, Wonde Premium ensures seamless data management and total peace of mind.

With so much to juggle each day, the last thing teachers need to worry about is logging students in at the start of lessons.

Multiple applications and platforms requiring different logins.

Time consuming password recovery process.

Security risks with multiple sets of credentials.

Imagine a tool that offers **super-fast single sign-on** with child-friendly options...

Maximise lesson time and boost student engagement.

Say goodbye to login issues, including forgotten passwords.

Super-fast easy login with child-friendly sign-in options.

Personalised dashboards with all your favourite apps.

“

You had 30 children in the classroom screaming ‘I don’t know my password’ ‘I can’t remember my password’ [it is] really stressful!

“

Using technology in the classroom just scared me! Sometimes, we would actively avoid ICT in lessons because the setting up was just too stressful and time consuming.

“

We have recently introduced MyLogin at Birchwood Primary School and it’s been an absolute game changer! One of the most impactful new resources in many years. Staff and pupils absolutely love it.

myloginlite

Log in to your personal dashboard and access all your favourite apps instantly.

- ★ **Super-fast single sign-on (SSO):** Access all your favorite learning apps in an instant.
- ✦ **Customisable dashboard:** Organise apps, shortcuts, and tools in one easy-to-use place.
- ★ **Hassle-free access:** No more juggling multiple credentials.

Personalised dashboard with all your apps

Free trial

mylogin

Unlock the full potential of integrated access!

All-in-one solution

All the benefits of MyLogin Lite plus the ability to manage your devices like Microsoft laptops and Google Chromebooks for seamless access experience.

MyLogin goes beyond SSO, combining app and device management for a seamless experience.

Complete control

Streamline both digital and physical environments from one dashboard.

Total convenience

Secure, seamless access to all your learning tools.

Quickly and easily sync students, teachers and groups to platforms

A simple, effective data synchronisation tool that enables schools to automatically update Apple School Manager, Microsoft Entra or Google Workspace with data directly from their School Information System.

- Guarantee accuracy
- Save time
- Protect your data

Provisioning made easy

- ✓ Updates directly from your SIS
- ✓ Keep users, classrooms, teams and more up to date daily
- ✓ Automate end of academic year processes
- ✓ Create naming conventions based on school specific requirements
- ✓ Automatically populate user's calendars with their timetable classes

The Wonde Enterprise Portal

Wonde provides a scalable data management solution for your schools, resulting in enhanced connectivity, centralised control and visibility, and a more secure vendor ecosystem.

Centralised 'Authorisation' of vendors

Centrally control which vendors you allow your schools to connect with via Wonde.

Vendor security and compliance

Mandate specific standards such as ST4S being met before vendors are available to schools.

Complete ecosystem control & oversight

View which schools are using which vendors and the ability to Approve, Decline and Revoke vendors.

Vendor approval workflow

Ability for schools to 'Register Interest' in a vendor and centrally streamline the compliance review and approval process.

Secure data sharing

Control exactly what data your schools can share with which vendors and for how long.

Full audit trail

Visibility over the log of all activity that takes place on a school by school basis.

"Wonde has enabled DfE South Australia to establish a jurisdiction view of all 3rd party applications connecting to Department SIS master data. Using Wonde's Enterprise Portal, we can see, approve or revoke connection requests, and support the onboarding of apps with appropriate security reviews prior to connection.

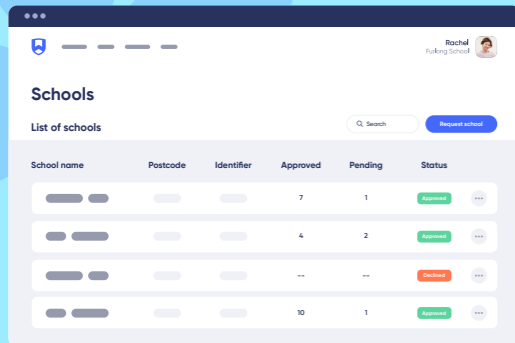

An added benefit has been the ability to work with Wonde on applications that we want to rollout in an accelerated fashion. The Wonde API allows selected apps to connect to a data store that means any site, whether they are on the legacy or new SIS, can use the new digital services."

South Australian Department for Education

Providing secure solutions at scale

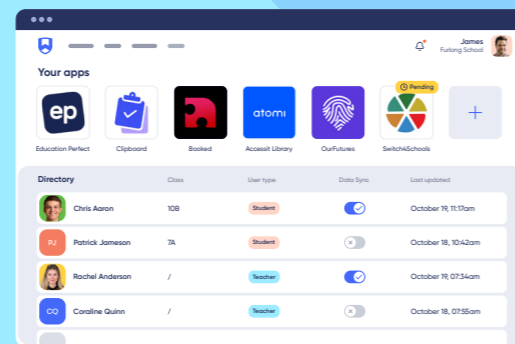

30k+ schools
700+ EdTech apps
60+ countries
97% CSAT score

Statistics up to date as of April 2026.

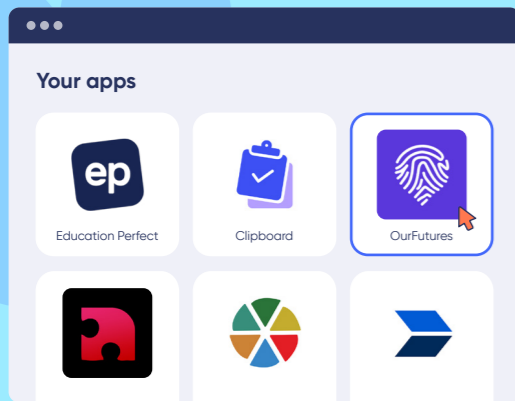

Jurisdiction requirements

Manage all aspects of an integrated vendor ecosystem, alongside your existing infrastructure.

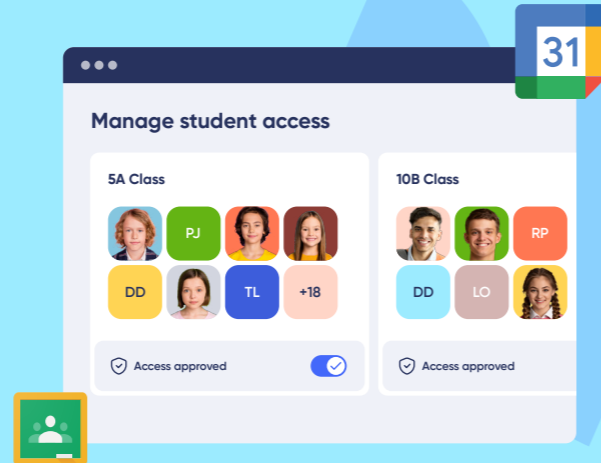

Seamless data integration

A secure, easy-to-use portal to manage data sharing with applications, providing full visibility and control.

Secure single sign-on

Saving valuable administration and class time with a secure single sign-on to log in to all applications quickly and easily.

Working with key partners

Seamlessly provision users, groups and classrooms for Google Workspace for Education, Apple School Manager and Microsoft Active Directory.

For the schools that like to **build**

Your data, your way

Wonde provides a scalable data management solution for your schools, resulting in enhanced connectivity, centralised control and visibility, and a more secure vendor ecosystem.

Why it's a great fit for your team

Everything in one place

You don't have to manage your own API connections to the SIS; we handle the "invisible" infrastructure so you can focus on development.

Consistent and secure

Sync your school's data with Wonde when you need it. No more waiting for scheduled syncs—enjoy real-time flexibility.

Total oversight

Just like any other app, you can see exactly what data your internal tools are accessing right from your Wonde School Portal.

Total creative freedom

Build your own internal apps and power them with your school's live data. Our intuitive and powerful endpoints allow you to easily make calls to retrieve or update information.

Advanced reporting

Connect live SIS data directly to business intelligence tools like PowerBI or Tableau for dynamic reporting and data-driven dashboards.

How it works

You build

Your team develops a bespoke app tailored to your school's specific needs.

We connect

Use our API framework to bridge the gap between your new app and your SIS.

You control

Securely extract things like timetables, class lists, and staff details.

Work simplifies

Your internal tools stay up to date automatically, without manual CSV exports or administrative "noise".
